Brunei Darussalam supports the UN’s efforts in ensuring the responsible behaviour of states in cyberspace to maintain international peace and security.

In line with this, the Ministry of Defence and the Royal Brunei Armed Forces of Brunei Darussalam are active and committed towards increasing the level of readiness in identifying cyber threats in all areas. This is achieved through frequent participation and support of practical cooperation under the ASEAN Defence Ministerial Meeting Plus Experts Working Group in Cyber Security, which includes participation in discussions, exchange of visits and undertaking joint military exercises in cyber security.
